## VISUAL

### PLC remote control application

Have your station display always within reach! Support for connecting to multiple PLCs. Option to download menu and panel definitions directly from the PLC.

Select a profile to set up access from the local network or from the Internet. **Simple** switching between profiles. Several users with different rights can be defined for the HT200 terminal and the mobile platform. Depending on their access level, it is possible to read and change values, including **alarm confirmation** and **time program setting**.

**NEW**

**Summary alarms** - automatic generation of active alarms

Merbon Visual can be downloaded for **free**.  
The version for Windows is available at [www.domat.cz](http://www.domat.cz).
